

BioStar SDK

Revision Notes

Version 1.1

Revision Notes

Software Version 1.1

2008-12-3

- BioStar SDK supports BioLite Net in addition to BioStation and BioEntry Plus.
- BEOutputPatternBLN, BELEDBuzzerConfigBLN, BETnaEventConfig, BETnaEventExConfig, BEConfigDataBLN, and BESysInfoDataBLN structures are added for BioLite Net. These structures are used for BS_WriteConfig and BS_ReadConfig functions.
- BS_TNA_AUTO constant is added for the tnaMode field of BEConfigDataBLN.
- BS_DEVICE_BIOLITE constant is added as a device type.
- The password field is added to BEUserHdr structure. This field is effective only for BioLite Net.
- The C++ and C# examples are modified to support BioLite Net devices.

Software Version 1.0
